PROFESSIONAL SUMMARY

Full Stack Developer (B.Tech CSE, 2025) with experience delivering production web applications for clients and building RESTful APIs, React/Node.js apps, and data-driven tools. Currently deepening expertise in full-stack development and DSA. Passionate about clean code, automation, and shipping reliable software end-to-end.

EDUCATION

University of Engineering & Management, Kolkata
B.Tech, Computer Science & Engineering GPA: 7.66/10.0

Aug 2021 – Jul 2025

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL, JavaScript
Frontend: React, Vite, HTML5, CSS3
Backend: Node.js, Express, FastAPI
Databases: MySQL, SQLite
Testing: Selenium, PyTest, Jest, Cypress, Postman/Newman
DevOps / Tools: Git, GitHub Actions, Docker, AWS EC2, Netlify
Methodologies: Agile/Scrum, REST API design, CI/CD

PROFESSIONAL EXPERIENCE

Binapani Automation

Feb 2026 – Mar 2026

Freelance Web Developer (Contract)

Kolkata, India

- Designed and developed the company's **official marketing website** from scratch — responsive multi-section layout covering services, about, and contact pages.
- Built with **HTML5, CSS3, and JavaScript**; deployed on Netlify with Git-based continuous deployment for seamless future updates by the client.
- Delivered the complete project within a **2-month** timeline, coordinating directly with stakeholders on design feedback and iterating to final approval.

Digital Blinc

Jul 2024 – Sep 2024

Full Stack Development Intern

Remote

- Built a **Job-Portal Web App** end-to-end — responsive HTML/CSS/JS frontend and RESTful Node.js/Express backend for job posting, search, and application workflows.
- Designed the **MySQL database schema** for users, job listings, and applications; authored migration scripts and data-validation logic.
- Wrote **Jest** unit tests and **Cypress** end-to-end tests, increasing overall test coverage by **30%**.
- Deployed the application on **AWS EC2** via Docker within Agile sprints; participated in code reviews.

PROJECTS

Binance USDT-M Futures Trading Bot | React, Vite, FastAPI, Python, Binance API

Oct 2024

- Developed a full-stack trading platform with React/Vite frontend and FastAPI backend supporting market, limit, stop-limit, and OCO order types via Binance Futures REST API.
- Implemented **TWAP** (slippage reduction) and **grid-trading** (volatility capture) algorithmic strategies.
- Built a real-time dashboard showing balance, PnL, and active orders with WebSocket integration and automatic timestamp synchronisation.

LoanPro – Local Loan Management System | Python, SQLite

Nov 2024

- Built a fully **offline** loan-management app with SQLite backend covering applications, status tracking, and an admin approval/rejection panel.
- Implemented real-time automatic eligibility calculation, eliminating manual review for **100%** of standard applications.

Personal Portfolio Website | HTML, CSS, JavaScript, Netlify

Ongoing

- Designed and deployed a responsive portfolio at surjya003.netlify.app with Git-based continuous deployment; showcases all projects and skills.
